Snake Creek Mines.

Snake creek canyon has been prospected for precious metals almost from the earliest days of mining in this state and long before the discovery of the great Ontario or the building of Park City. Some very rich ore has been taken out along the north slope of the canyon in many places, the Bananza Flat has passed through several mining excitements on account of the discoveries that have been made there and claims on that flat are considered to be valuable holdings. All miners agree that there must be large bodies of valuble ore in that mountain but no true fissher veins carrying paying values have as yet been discovered, on the Wasatch county slope, unless it be on the Bonanza Flat.

The most of the territory described above is located and much of it is patened and the groupes beginning at the head of the canyon are as follows: The Mountain Lake Mining company has about 40 patened claims extending from the Park City slope along the ridge at the head of Snake Creek and over into American Fork canyon and covering a large tract of ground in the Big Cottonwood canyon. This company has recently purchased the Steam out property in the head of Snake Creek consisting of about 30 patented claims. Next comes the Lions, Wide West, Heber City, Big Four, Balsom Grove, Bogan property, consisting of 13 patented claims, Lone Pine, Southern Tier, with a large block of patented claims, St. Louis Vasser, Wolverine, Success, the Fatterson property, Bou der Basin. The last named groupe has a long list of
